

SPRAY SMARTER

KNOW YOUR OPTIONS

Not all glyphosate products are the same. Make sure you know what you're spraying in your field.
With the right information, you can decide what's best for your farm.

SMARTER CONTROL

While many generic glyphosate brands promote lower input costs, a look at the numbers shows that farmers will need more of a lower Acid Equivalency (A.E.) product to achieve the same weed control from just 1 litre of a Roundup® branded glyphosate-only agricultural herbicide.

- A.E. is the measure that defines efficacy; the higher the A.E. applied per acre, the better the weed control.
- Some generic brands will promote A.I. (active ingredient) vs A.E.
- Higher use rates needed for effective control with lower A.E. products can result in higher application rates, which can increase costs and take up more room in the tank.

TOTAL REQUIRED HERBICIDE JUGS, BASED ON 100-ACRE AREA

Each jug = 9.5 litres of herbicide. The graphic above shows how generic products with a lower A.E. don't always measure up when it comes to effective control and value.

Product	Salt	A.I. (g/L)	A.E. (g/L)	A.E. Rate (kg/ha)
Generic A	IPA	647	480	2.52
Generic B	IPA	480	360	3.36
Roundup WeatherMAX®	K	600	540	2.24
Roundup Transorb® HC	K	600	540	2.24

ROUNDUP® BRAND GLYPHOSATE-ONLY AGRICULTURAL HERBICIDE BENEFITS

In addition to providing lower application rates and higher A.E., Roundup® glyphosate-only agricultural herbicides offer different formulations to suit the specific needs of your operation.

Roundup WeatherMAX®

Growers prefer Roundup WeatherMAX® for:

- Proven crop safety
- Unsurpassed and consistent weed control under ideal and tough conditions
- 30-Minute Rainfast Guarantee
- Enhanced efficiency with a 540 g/L formulation
- Support through RiskShield® protection package

Roundup Transorb® HC

Roundup Transorb® HC herbicide offers you:

- Unsurpassed weed control and consistency of control
- Trusted performance
- 60-Minute Rainfast Guarantee
- Product service and support you can count on
- All Weather Warranty
- Support through RiskShield® protection package
